Aryabhatta Knowledge University, Patna

B.Tech Examination, 2013

Time: 03 Hours

Code: 051401 ***Subject: Object Oriented Programming*** ***Full Marks: 70***

Instructions:-

(i) All questions carry equal marks.
(ii) There are NINE questions in this paper.
(iii) Attempt FIVE questions in all.
(iv) Question No. 1 is compulsory.

Q.1 Choose the correct answer (any seven) : **[14]**

(a) Which of the following statements is correct?
- (i) A reference is stored on heap
- (ii) A reference is stored on stack
- (iii) A reference is stored in a queue
- (iv) A reference is stored in a binary tree

(b) How many parameters does a Default Constructor accept?
- (i) 0
- (ii) 1
- (iii) 2
- (iv) 3

(c) Destructor has the same name as the constructor and it is preceded by
- (i) ~
- (ii) !
- (iii) &
- (iv) ?

(d) Which of the following types of class allows only one object of it to be created?
- (i) Virtual class
- (ii) Abstract class
- (iii) Singleton class
- (iv) Friend class

(e) Which of the following statements is correct?
- (i) Two functions having same number of argument, order and type of argument can be overloaded if both functions do not have any default argument
- (ii) Overloaded function must have default arguments
- (iii) Overloaded function must have default arguments starting from the left of argument list
- (iv) A function can be overloaded more than once

(f) Which of the following statements is incorrect?
- (i) Default arguments can be provided for pointers to functions
- (ii) A function can have all its arguments as default
- (iii) Default argument cannot be provided for pointers to functions
- (iv) A default argument cannot be redefined in later declaration

(g) Which of the following is not a type of constructor?
- (i) Copy constructor
- (ii) Friend constructor
- (iii) Default constructor
- (iv) Parameterized constructor

(h) Which of the following access specifies is used in a class definition by default?
- (i) Protected
- (ii) Public
- (iii) Private
- (iv) Friend

(i) Which of the following statements is correct with respect to the use of friend keyword inside a class?
- (i) A private data member can be declared as a friend
- (ii) A class may be declared as a friend
- (iii) An object may be declared as a friend
- (iv) We can use friend keyword as a class name

(j) How many types of polymorphisms are supported by C++?

(i) 1 (iii) 3

(ii) 2 (iv) 4

Q.2 Solve both questions : **[14]**

(a) Define string. How does a string type differ from C type string?

(b) WAP in C++ that reads a particular string and displays the frequency of each character in the string.

Q.3 Solve both questions : **[14]**

(a) What is ST? Describe with example.

(b) WAP in C++ using the function count() to how many elements in a container have a specified value.

Q.4 Solve both questions : **[14]**

(a) Explain exception handling and their types.

(b) WAP in C++ to demonstrate the use of multiple Catch statements.

Q.5 Solve both questions : **[14]**

(a) Describe streams.

(b) Write about the following functions: put(); get(); width(); getline(); fill().

Q.6 Solve both questions : **[14]**

(a) Describe polymorphism with suitable examples.

(b) WAP in C++ using array of pointers to accept desired number of integers and display their sum.

Q.7 Solve this question : **[14]**

What is inheritance? Describe its types with examples.

Q.8 Solve both questions : **[14]**

(a) Explain 'this' pointer. Differentiate between overloaded functions and function templates.

(b) What is a virtual function? WAP to demonstrate use of virtual functions.

Q.9 Solve both questions : **[14]**

(a) Explain friend function along with example.

(b) Describe type conversion with examples.
